Insights from Data

REVIEW	HISTORY

Meets Specifications

Congratulations, You did great work by creating a presentation that demonstrates three different insights from "LinkedIn top skills 2016" dashboard, in addition to adding clear and concise conclusions based on your observations from the data. Gaining the knowledge to make conclusions from a data visualization is a very important skill, you need to obtain to build your data analytical skills.

Check this link: **Tableau Public Gallery: Viz of the Day** → This is a very interesting gallery that shares the most creative visualizations built through Tableau on a daily basis. This gallery can help you to get inspiration and learn new data skills.

Keep up the good work, and best of luck in your next projects 🙂

Completeness

Three insights are reported using one Dashboard.

Each insight has an explanation describing how the insight was reached from the data.

For each insight, provide a screenshot that shows what you found in the dashboard.

Great adjustments! You added three descriptions to each of the three insights, which depict your knowledge with the available tools in the data visualizations of "LinkedIn top skills 2016" dashboard.

Correctness

Student's conclusions are correct based on the data.

The dashboard was used appropriately to find the information.
